Self Organizing Feature Maps

Evan Verworn (4582938) <ev09qz@brocku.ca>

Abstract—**The abstract goes here.**

I. INTRODUCTION

THIS demo file is intended to serve as a "starter file" for IEEE journal papers produced under LaTeX using IEEEtran.cls version 1.8 and later. I wish you the best of success.

II. BACKGROUND

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.

III. METHODOLOGY

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.

IV. EXPERIMENTS

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.

V. ANALYSIS

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.

This is some long text that I'm going to write to see how everything should be layed out. We will see how this goes, this should be long enough to prove my point.
